### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5, 8-14 and 16-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Capofreddi, 6,553,398.

Capofreddi's claim 1 teaches a filter which receives an input signal at an input port and couples the input signal to m parallel input paths with the m paths containing delayed versions of the input signal followed by performing m convolutions on the m signals. Also, note Fig. 5 which illustrates the case for m=2. Relative to claim 13 note that the "at least one register" and "latches" correspond to the leftmost S/H circuit and the next two leftmost S/H circuits of Fig. 5.

Relative to applicant's remarks, (a) the analog signal  $x(t)$  may be considered a data stream, also once the  $x(t)$  is sampled another data stream is generated, (b) samples may clearly be considered data elements, (c) the multipliers and adders of Fig. 5 as well as the sample and hold circuits are clearly a data processor and (d) the data processor performs convolutions of a quantized impulse response ( $C_0-C_{n-1}$ ) with data substreams ( $x(k)t$  and  $x(k-1)t$ ).

*Conclusion*

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
